

Adobe Dreamweaver CS3 Advanced - 1 Day

About the course

Course Overview: This course concentrates on designing and creating sophisticated pages in Dreamweaver CS3 using the most up to date methods.

You will learn how to take advantage of powerful new layout and interactivity features in Dreamweaver CS3, letting you create dynamic and standards-compliant web pages. The course is based on realistic projects, and the small group size provides plenty of scope for delegates to ask questions and explore areas of interest.

Prerequisites: A good working knowledge of Dreamweaver.

In this course the following areas will be covered:
